

# INTERNSHIP AT MÄLAREN HÄSTKLINIK

**Mälaren Hästklirik is one of largest equine hospitals in Scandinavia offering a full emergency and surgical service. We employ 26 vets of which 15 work at our main facility, 50 minutes from Stockholm. We have run the internship program at the hospital for 6 years and in the last year also invited applicants who are fluent in English.**

Our facilities include an orthopaedic clinic, two surgical theatres, inpatient care, diagnostic imaging (digital x-ray, ultrasound, standing MRI) and advanced dental care. We are extremely busy, with 23,000 patient visits per year. In addition, we run an ambulatory and reproductive service. We have a very varied caseload including racehorses, sports and pleasure horses. In the spring of 2020 we will open our new purpose-built hospital, giving us even more capacity and ability to serve our customers.

We are offering a 12-month internship program starting in June and August. The internship is mainly hospital based but there will also be a small amount of ambulatory work. At the end of this program we would anticipate that the intern will have developed a wide range of clinical skills and competencies, including emergency work, in-patient care, orthopaedic and diagnostic imaging. Following the internship, the applicant will be well grounded for private practice or a residency application.

The intern will be exposed to all departments within the hospital. However, the primary rotations will be in-patient care, surgery, orthopaedics and diagnostic imaging. This is a highly challenging and demanding position, however you will be fully supported by our experienced staff.

In addition to a weekly journal club, we hold regular orthopaedic and radiology rounds to which our interns are encouraged to attend.

Applicants must:

- Show initiative, be willing to learn and be committed to providing the best possible service to our clients
- Hold an EU veterinary degree
- Be fluent in English or one of the Scandinavian languages

Out-of-hours duty for emergency admissions and in-patient care are shared on a 1 in 5 rotation. Paid holiday for 25 days. Accommodation provided on site.

**If you wish to apply for this intern position, please send your full curriculum vitae with a recent photograph and contact details of two referees possible to Maria Svensson, [ansokan@hastklinik.se](mailto:ansokan@hastklinik.se)**
